### **Narrative Description**

All West Communications planned for a number of specific improvement projects for 2015, including new line extensions and equipment installations, cable and other equipment additions and upgrades, and maintenance of existing facilities. These projects have significantly improved voice service coverage, broadband access and speeds, and the overall capacity of the network.

Specific capital improvement projects, along with USF received, are set out in **Attachment 1**, 5-year Service Quality Improvement Plan. **All West Communications has recently completed several FFTP projects that will bring more reliable and increased bandwidth capabilities to a greater number of our current and future subscribers. We have also upgraded our backbone and middle mile facilities in order to accommodate this increased demand for bandwidth. We are continuing to migrate to an all IP network with additional investment in general support facilities and equipment along with transmission, cable, and supporting facilities. All West Communications' planned capital expenditures for 2016-2020 are an estimate of the amount required to maintain our current FFTP build and meet carrier of last resort obligations. Any additional cash flow generated from operations will be used to service the debt incurred with the FFTP build.**

As set out in **Attachment 1**, the Company estimated that its total capital expenditures in 2015 within the State of Wyoming will be approximately \$160,000. The Company estimates that its service quality improvements completed in 2015 will serve a population of approximately 706 and cover an area of approximately 331 square miles. As of December 31, 2015, All West Communications spent \$246,550 of the \$160,000 and completed 100% of the planned projects. The map included in **Attachment 1** details out the locations of the currently completed projects.

**Attachment 1** also sets out the projected capital expenditures, population and area served for the years 2016-2020. The projected expenses, along with the projects listed within this update, are used to improve service coverage and service capacity. The USF received year-to-date is allocated between CAPEX and OPEX and has been used in accordance with Federal rules and obligations, in the public interest to improve service quality, service coverage and service capacity.
